

SYNCopen™ for CT motion™

Interface between the contrast media injector and CT scanner

What are the advantages of SYNCopen?

- **Real-time data exchange** via the interface between the contrast media injector and CT scanner
- Quality assurance through the **automatic sending of injection parameters** from the injector to the CT scanner
- **Improved workflow** thanks to a single-button start

Get more out of your CT motion

Function	CT motion without SYNCopen	CT motion with SYNCopen
Synchronous start & stop of injector and scanner	–	■
Provision and display of injection protocols on the scanner	–	■
Transmission of injection parameters to the RIS/PACS system	–	■
Optimized image quality thanks to synchronous start	–	■
One-time entry of injection protocols saves time and administrative effort	–	■

SYNCopen supports
CANopen Class 4
